Gen AI Assignment - Week 1 - Day 1

Model Provider: Open AI
Model: GPT-6 Astra
Release Date: Sept 3, 2026
Cut off Date: Mid-2026
Cost of tokens: $10.00 / $50.00 [Per million Input / Output]
Context Window: 1.05 Million
Type: Proprietary / Closed API
When to use this model: Autonomous computer control, complex coding, and multi-step reasoning agents.

Model Provider: Anthropic
Model: Claude Opus 5.5
Release Date: Sept 2026
Cut off Date: Mid-2026
Cost of tokens: $8.00 / $25.00 [Per million Input / Output]
Context Window: 1 Million
Type: Proprietary / Closed API
When to use this model: Deep qualitative analysis, high-level coding, and intricate long-context reasoning.

Model Provider: Google
Model: Gemini 4 Argon
Release Date: Sept 2026
Cut off Date: Late 2026
Cost of tokens: ~$3.00 / $12.00 [Per million Input / Output]
Context Window: 1+ Million
Type: Proprietary / Closed API
When to use this model: Native multimodal processing, financial/legal workflows, and complex physical robotics simulation.

Model Provider: DeepSeek
Model: DeepSeek V4 Pro
Release Date: July 20, 2026
Cut off Date: Mid-2026
Cost of tokens: $0.435 / $0.87 [Per million Input / Output]
Context Window: 1 Million
Type: Open Weights
When to use this model: High-performance enterprise deployment requiring ultra-low production costs.

Model Provider: Meta
Model: Muse Wonder
Release Date: Oct 12, 2026
Cut off Date: Late 2026
Cost of tokens: Mixed / Free (Self-host)
Context Window: 1 Million
Type: Mixed Open Weights
When to use this model: Highly accurate local deployment, text-to-media orchestration, and private agent frameworks.

Model Provider: xAI
Model: Grok 4.7
Release Date: Sept 2026
Cut off Date: May 2026
Cost of tokens: $2.00 / $6.00 [Per million Input / Output]
Context Window: 500,000
Type: Proprietary API
When to use this model: Configurable chain-of-thought reasoning, live web data scraping, and coding automation.

Model Provider: Moonshot AI
Model: Kimi K3.1 Pro
Release Date: Oct 22, 2026
Cut off Date: Mid-2026
Cost of tokens: Variable API Plans
Context Window: 1.04 Million
Type: Proprietary Flagship
When to use this model: Extended output generation (supports massive long-form target text outputs).

Model Provider: Z.ai (Zhipu)
Model: GLM-5.3
Release Date: Aug 25, 2026
Cut off Date: Mid-2026
Cost of tokens: Free Tier / Low-cost API
Context Window: 1 Million
Type: Open Weight Hybrid
When to use this model: Budget-friendly localized agent usage and multi-turn open-weight fine-tuning.

Model Provider: Mistral AI
Model: Mistral Large 4
Release Date: Oct 5, 2026
Cut off Date: Mid-2026
Cost of tokens: ~$2.00 / $6.00
Context Window: 512,000
Type: Open Weights
When to use this model: Multilingual European corporate applications requiring sovereign data control.

Model Provider: MiniMax
Model: MiniMax M3.1 Flash
Release Date: Oct 2026
Cut off Date: Mid-2026
Cost of tokens: Ultra Low / $0.002 Short Request
Context Window: 1 Million
Type: Proprietary API
When to use this model: Extreme token throughput, fast response times, and massive chat application backends.
